

Mamba Sports Academy Integrated Sports Medicine is a multi-disciplinary clinic that utilizes sports science integrating Medical, Chiropractic, Physical Therapy, Nutrition, Massage Therapy, and Biomechanical analysis to efficiently diagnose and rehabilitate our athletes. Our diversity within our providers allows us to treat our clients with a multitude of advanced manual therapies, corrective exercise strategies, instrument assisted soft-tissue manipulation, active release technique, therapeutic cupping, joint mobilizations and much more.

This program is considered an integral part of the Mamba Sports Academy Integrated Sports Medicine center and provides students with an opportunity to develop a core of knowledge and related skills to prepare them for professional work in the field. The knowledge acquired is complemented by the requirements that interns meet specific prerequisite University courses. The internship provides an opportunity to transfer and apply the knowledge acquired in the University setting to the practical application in a medical office. We believe this is the best way to learn how to serve as a health professional. Under the guidance and supervision of experienced professionals, the intern will practice skills, apply knowledge, and test theories and concepts.

The internship thus allows for exponential professional growth, assisting in the identification of personal strengths and weaknesses, applying learned theory to practical situation, and the appreciation of the role, duties, and responsibilities of the work that has been chosen as a career.

INTERN REQUIREMENTS:

- Must be a current junior or senior or graduate of University
- Must have already completed general biology, anatomy, and physiology coursework
- Must have a career interest in sports medicine or related field

APPLICATION DEADLINE: DECEMBER 31, 2019

****ONLY ACCEPTING APPLICANTS FOR JANUARY-APRIL 2020 ROTATION****
